

CHANGE PROGRAMME MIS-MANAGEMENT.

Change programme managers need to understand how to integrate, not just how to deliver change activities alone.

Clear Routemap based journeys.

Intelligent change programme and business transition support.

Full knowledge transfer with the Voyager Handbooks™ suite.

Ask a Voyager person to support your change programme management and you will get a combination of project management; change management; business engagement and integration experience.

Our themed routemaps are used extensively to help project teams, business people and other consultants to understand the whole journey, and how it all fits together in a language they will understand.

As a client, you still drive the programme, but we help to support you and navigate.

Our Voyager Handbooks™ Methodology suite provides change management helpers, templates and sample case study materials to link into the routemaps.

Our change programme support combines consulting; coaching and product toolkits.
